

A close-up photograph of a small, fluffy kitten with orange and white fur, looking towards the camera. The kitten's face is the central focus, with its eyes and whiskers clearly visible.

**We will never change our
steadfast commitment to quality.**

Brownwood's New Enhancements

There have been several enhancements to our Brownwood, TX facility to keep up with the growing demand. The biggest enhancement is the install of our pallet racking, which has brought our warehouse storage capacity to an additional 10 van loads of product to be stored onsite. This will help reduce lead times and allow us to carry more of a diverse ingredient profile mix. There has been several exterior transformations made around the facility itself including; new truck scale, concrete dock pads, parking lot and a tin roof. Be on the watch

for more enhancements coming up the pipeline in the future!

INGREDIENT MARKET UPDATES
